Audit date: October 6, 2026

Claude Skill and Plugin by Alex Labat

Executive Summary

Mecca Limo's website is technically excellent and well ahead of most local transportation competitors. All 131 URLs (25 service and location pages, 106 blog posts) load cleanly, every page has a unique title and meta description, a single descriptive H1, a self-referencing canonical, full Open Graph tags and image alt text, and LocalBusiness schema with address, hours and service area. The most valuable remaining opportunity is answer-engine depth: 92 blog posts already use question-style headings but only 13 carry FAQ schema, and no page uses Speakable markup. Mobile lab speed is 97–99/100 after the October 6 fixes, but Google's 28-day field data (Core Web Vitals) still reflects the slower previous site and will take about four weeks to clear.

Dimension	Score	Status	Key Takeaway
SEO	9/10	Strong	Clean technical foundation; 3 overlong titles fixed during the audit.
GEO	9/10	Strong	Strong entity, NAP, reviews and llms.txt; few external citations.
AEO	8/10	Strong	FAQ schema on 19 of 25 pages; most blog posts lack it.
Combined	26/30		

Pages Audited

Every URL in the XML sitemap was fetched: 25 pages and 106 blog posts (131 total, all HTTP 200).

URL	Page Type	Notes
/	Homepage	1278 words, 19 schema types, FAQ schema
/service/	Service / location	1931 words, 13 schema types, FAQ schema
/charleston-airport-pickup-guide/	Service / location	903 words, 13 schema types, FAQ schema
/airport/	Service / location	1457 words, 13 schema types, FAQ schema
/summerville-limo-service/	Service / location	757 words, 13 schema types, FAQ schema
/daniel-island-car-service/	Service / location	799 words, 13 schema types, FAQ schema
/attractions/	Service / location	1021 words, 13 schema types, FAQ schema
/policy/	Company / utility	1083 words, 8 schema types
/beach/	Service / location	1085 words, 13 schema types, FAQ schema
/cruise-trips/	Service / location	804 words, 13 schema types, FAQ schema

/contact/	Company / utility	536 words, 11 schema types
/[106 blog posts]	Blog posts	1078–1713 words, BlogPosting + author schema, 13 with FAQ schema

SEO Analysis

Score: 9/10 — Strong

Technical On-Page

Signal	Finding	Status
Title tags	All 131 unique; 50–60 characters on pages. Homepage: “Charleston Limo Service: CHS Airport & Weddings Mecca Limo” (60). Three titles over 60 characters were shortened during this audit.	Good
Meta descriptions	Present and unique on all 131 URLs, none over 160 characters. Homepage description is 147 characters and leads with the brand and services.	Good
Headings	Exactly one H1 on every URL; homepage H1 “Charleston limo service with comfort, safety & luxury.” Logical H2/H3 outline with no skipped levels.	Good
Get a Quote H1	The /get-a-quote/ H1 is just “Get a Quote”; a local keyword would help, e.g. “Get a Free Limo Quote in Charleston”.	Needs Attention
URL structure	Short, readable slugs (/airport/, /wedding/, /kiawah-island-car-service/). /charleston-bachelorette-party-transportation/ is listed in both the page and post sitemaps.	Needs Attention
Canonical / robots	Self-referencing canonical on every URL; no noindex anywhere; robots.txt blocks only admin and internal search.	Good
Mobile / viewport	Viewport set on all pages; mobile Lighthouse performance 97–99, accessibility 100.	Good
Image alt text	0 images missing alt text across the site.	Good
Open Graph / X cards	og:title, og:description and og:image present on all URLs.	Good

Content Quality

Signal	Finding	Status
Word count	Pages 536–1931 words (median 867); posts 1078–1713. No thin pages.	Good
Location pages	Summerville (757), Daniel Island (799), Mount Pleasant (718) and Hourly Charter (742) are the thinnest money pages; local landmarks, drive times and a short FAQ would deepen them.	Needs Attention
Freshness	Modified dates in schema on all URLs; homepage	Good

Signal	Finding	Status
	shows a 2026 copyright but no visible “updated” date.	
Readability	Short sections, lists and FAQ accordions throughout.	Good

Structured Data

Signal	Finding	Status
LocalBusiness	On all 131 URLs with address, geo, hours (24/7), 12 service-area cities and sameAs social links.	Good
Service / Breadcrumbs	Service schema on 18 pages; BreadcrumbList on 24 of 25 pages but only 1 of 106 posts.	Needs Attention
Review / rating	Homepage carries AggregateRating (5.0, 153 reviews) matching the visible reviews section (added October 6).	Good
Core Web Vitals	Field data (28-day) fails on LCP/CLS from the previous site; lab tests now pass. Verify at pagespeed.web.dev after early November.	Needs Attention

GEO Analysis

Score: 9/10 — Strong

E-E-A-T Assessment

Signal	Finding	Status
About page	/about/ explains the family-owned business, chauffeurs and values (762 words, AboutPage schema).	Good
Contact / NAP	Phone (843) 804-1188, address 1914 Weeping Cypress Dr, hours and email consistent across site, schema and Google Business Profile.	Good
Trust signals	5.0 Google rating (153 reviews), /reviews/ page, licensed & insured statements, testimonials on the homepage.	Good
Authors	Blog posts carry Person authors in schema, but the names are customer reviewers rather than the business owner; a real author byline (e.g. the owner) with a short bio would be stronger.	Needs Attention

Content for AI Synthesis

Signal	Finding	Status
Entity clarity	"Mecca Limo" named consistently with clear service and location statements in the first paragraph of each page.	Good
Factual density	Concrete facts: seat counts (Sprinter 14, SUV 6, sedan 3), drive times from CHS, 20-minute free wait, service areas.	Good
External citations	Few references to authoritative external sources (airport, venues, city); adding them on guides would raise citability.	Needs Attention
llms.txt	Present with summary, contact, services and links.	Good

Technical GEO

Signal	Finding	Status
AI crawler access	robots.txt allows GPTBot, ClaudeBot, PerplexityBot and Google-Extended.	Good
Server-rendered content	All key text is in the raw HTML (no JS-only content).	Good
sameAs links	Facebook, X, Instagram, TikTok, LinkedIn and YouTube linked in schema.	Good

Signal	Finding	Status
Speakable	No SpeakableSpecification on any page.	Missing

AEO Analysis

Score: 8/10 — Strong

Featured Snippet Eligibility

Signal	Finding	Status
Question headings	Question-phrased H2/H3s on 22 of 25 pages and 92 of 106 posts.	Good
Direct answers	FAQ answers are short, self-contained paragraphs suited to snippets.	Good
Lists / tables	Numbered booking steps and bullet lists present; no comparison tables (e.g. vehicle vs. passengers vs. luggage).	Needs Attention

Structured Answer Formats

Signal	Finding	Status
FAQ schema	On 19 of 25 pages; only 13 of 106 posts despite 92 posts using question headings.	Needs Attention
HowTo	"Booked in three easy steps" content has no HowTo markup (low priority; Google rarely shows HowTo now).	Needs Attention
Speakable	Not used.	Missing

Voice Search Readiness

Signal	Finding	Status
Conversational content	Natural phrasing and long-tail questions ("How far in advance should I book?", "Do you handle CHS airport transfers?").	Good
Local signals	NAP, LocalBusiness schema, 12 named service areas and location pages for Mount Pleasant, Summerville, Daniel Island and Kiawah.	Good

Priority Recommendations

Priority	Issue	Dimension	Effort	Impact
High	Grow Google review count (153 vs. 550–1,000 for top competitors) with a post-ride review request.	GEO	Low	High
High	Add FAQ schema to the 79 blog posts that already have question headings.	AEO	Medium	Medium
Medium	Expand the four thinnest location/service pages (Mount Pleasant, Summerville, Daniel Island, Hourly) with landmarks, drive times and FAQs.	SEO	Medium	Medium
Medium	Add a real author byline and bio (owner) to blog posts instead of reviewer names.	GEO	Low	Medium
Medium	Add BreadcrumbList schema to blog posts.	SEO	Low	Low
Quick Win	Rename the /get-a-quote/ H1 to include “Charleston”.	SEO	Low	Low
Quick Win	Remove the duplicate sitemap entry for /charleston-bachelorette-party-transportation/.	SEO	Low	Low
Quick Win	Add a vehicle comparison table (passengers, luggage, best for) to /charleston-limo-fleet/.	AEO	Low	Medium
Quick Win	Add Speakable markup to homepage FAQ answers.	AEO	Low	Low
Quick Win	Re-check Core Web Vitals field data in early November.	SEO	Low	Medium

What's Working Well

Technical hygiene	131/131 URLs return 200 with unique titles, descriptions, single H1s, canonicals and alt text.
Local entity	LocalBusiness schema on every URL, consistent NAP with the Google Business Profile, 24/7 hours.
Speed	Mobile Lighthouse 97–99, accessibility 100, best practices 100, SEO 100.
Reputation	5.0 Google rating from 153 reviews, displayed on-site with matching review schema.
Content depth	106 blog posts of 1,078–1,713 words and 25 service/location pages averaging ~900 words.
AI readiness	llms.txt, open AI crawler access, FAQ schema on 19 pages, clear factual

	statements.

Glossary

SEO: Search Engine Optimization: making pages easy for Google to crawl, understand and rank in the regular results.

GEO: Generative Engine Optimization: making content easy for AI answer engines (ChatGPT Search, Perplexity, Google AI Overviews) to understand, trust and cite.

AEO: Answer Engine Optimization: structuring content so search engines and voice assistants can lift a direct answer, as in featured snippets and “People also ask”.
